## Nostalgic Look And Feel! Modern Day Performance!

Flexo® F6® Quiet is specially engineered to reduce the noise associated with wire harnesses or cables installed in hard to reach areas such as door panels or dashboards.

The special construction suppresses noise from loose harnesses moving against body or dash panels.

F6® Quiet also has a soft and flexible feel, reminiscent of old style cotton loom, making it the perfect product for restoration projects.

Noise suppression wrap for harnesses and cable in cavities and dashboard installations.

Colors Available:  
Black (BK)
